Key Projects

Project: Oritina

Link: https://oritina.vercel.app

ProjectDetails: Oritina is a modern e-commerce destination for clothing, built as a full-stack application with Next.js and PostgreSQL. Customers can browse collections, read and contribute to the style blog, and checkout securely with Stripe. The platform is supported by a sophisticated admin dashboard for managing all aspects of the store, and is architected using Next-Auth, Zustand, and Uploadthing for a seamless development and user experience.

Technologies: next js, drizzle orm, typescript, javascript, react, node js, postgresql, zustand, stripe, next auth

Project: NextMart

ProjectDetails: Next Mart is an e-commerce website built with Next.js and Node.js where users can shop for products online. The platform uses Redux for state management and Tailwind CSS for styling. Customers can browse products, add them to cart, and make secure payments through the sslecommerce payment gateway. The entire application is developed with TypeScript for better code reliability.
